

# Payments & delivery

## Payment Methods

Services can be paid through various methods and frequencies, depending on your location and the type of contract agreed upon. All payments come with an official invoice, including those made in cash.

### ♦ International Clients

For clients located outside Madagascar, payment can be made via:

- **PayPal**
- **International bank transfer**
- **Western Union**
- **Taptapsend** (to Orange Money or MVola accounts)

### ♦ National Clients (Madagascar)

For clients based in Madagascar, payment options include:

- **Bank transfer**
- **Mobile Money** (Orange Money or MVola)
- **Cash** (in-person payment, with invoice provided physically or digitally)

## Payment Frequency

I offer flexible payment options depending on the nature of the project and your preferences:

Frequency	Accepted payment methods
Per day	Mobile Money, Taptapsend, Cash (with invoice)
Per week	PayPal, Bank transfer, Mobile Money, Taptapsend
Per month	PayPal, Bank transfer, Western Union

*A payment schedule can be established in advance based on the estimated workload and timeline.*

## Delivery of Services

All services are delivered **digitally**, using the format agreed upon at the start of the project. Deliveries may be made via:

- **Email** (Word, PDF, Google Docs, etc.)
- **Secure download link**
- **Shared drive** (Google Drive, Dropbox, etc. – upon request)

**Delivery timelines** are specified in each quote or contract.

In case of unforeseen delays beyond my control, I will inform you in advance and a new deadline will be mutually agreed upon.

## Invoicing

Each payment comes with a **detailed invoice**, sent by email (PDF) or provided in person (for cash payments). Invoices include:

- The services covered
- The amount paid
- The method of payment
- The date of payment

## Questions or Special Requests?

If you have specific needs or questions regarding payment or delivery, feel free to reach out via the **Contact page** or by email. I will be happy to find the most suitable solution for your project.
